

| <i>Session Title</i> | Big Data Services for Sustainable Development Goals |
|----------------------------|---|
| <i>Session Description</i> | <p>This sub-forum convenes experts and practitioners to explore the role of data in advancing regional sustainable development goals (SDGs). Focused on leveraging big data, analytics, and innovative technologies, participants will discuss strategies for integrating data-driven insights into policy-making and planning. The session will highlight successful case studies, fostering knowledge exchange on how to overcome data gaps, improve data quality, and ensure data accessibility. Attendees will engage in interactive workshops to enhance their capacity in using data for monitoring progress, identifying trends, and informing evidence-based interventions. The aim is to empower regional stakeholders to make informed decisions that balance economic growth with social and environmental considerations, ultimately contributing to the achievement of the SDGs.</p> |
