

<i>Session Title</i>	Accelerating SDGs with AI: The Role of Large Models and AI Agents
<i>Session Description</i>	<p>AI is advancing at an unprecedented pace, reshaping industries and societies worldwide. But how can we harness its power to accelerate progress toward the UN Sustainable Development Goals (SDGs)? This session delves into the transformative potential of large language models (LLMs) and AI agents in advancing the SDGs. We will explore cutting-edge AI applications, share best practices in SDG-focused AI deployment, examine ethical challenges, and address key global barriers to implementation.</p> <p>The session focuses on four key themes:</p> <ol style="list-style-type: none"> 1.Cutting-Edge Progress: Reviewing the latest advancements in AI for sustainable development. 2.Case Studies & Success Stories: Showcasing real-world applications of SDG-aligned LLMs and AI agents. 3.Ethics & Equity: Tackling bias, data privacy, and inclusive access to ensure AI benefits the Global South. 4. Collaborative Frameworks: Strengthening partnerships among academia, governments, NGOs, and tech leaders to scale AI solutions globally <p>Session Structure:</p> <ol style="list-style-type: none"> 1. Presentations (4-5 talks) – Expert speakers will explore the key themes. 2. Live Demonstrations (1-2 showcases) – Practical applications of AI for the SDGs. 3. Panel Discussion (30 min) – A deep dive into challenges and opportunities. 4. Interactive Q&A – Audience engagement to foster dialogue and collaboration.
